

Demonstration of Proposed Features

Date	1 July 2026
Team ID	SWTID-2026-1236
Project Name	Credit Card Approval Eligibility
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Input Form	Allows users to enter personal and financial details required for eligibility prediction.	Implemented	Yes	Working successfully
2	Input Validation	Checks whether all required fields are filled correctly before submission.	Implemented	Yes	Prevents invalid input
3	Credit Card Eligibility Prediction	Uses the trained Machine Learning model to predict whether the applicant is Accepted or Rejected.	Implemented	Yes	Prediction generated within a few seconds.
4	Result Display	Uses the trained Machine Learning model to predict whether the applicant is Accepted or Rejected.	Implemented	Yes	Clear and user-friendly output.
5	Flask Backend Integration	Processes user requests and connects the web application with the Machine Learning model.	Implemented	Yes	Successfully integrated
6	Render Deployment	Hosts the web application online for public access.	Implemented	Yes	Application is accessible through the deployed URL.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
