

Project Demo Planning

Date	2 July 2026
Team ID	SWTID-2026-1236
Project Name	Credit Card Approval Eligibility
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the team, explain the project title, objectives, and the problem being solved.	2	P. Devi Sri Ram
2	Solution Overview	Explain the system architecture, technology stack, and how the AI & ML model predicts credit card eligibility.	3	K. Mahesh Reddy
3	Live Website Demonstration	Open the deployed website, enter applicant details, submit the form, and show the Accepted/Rejected prediction on the same webpage.	5	P. Venkata Sai Kushal
4	Technical Explanation	Explain the Machine Learning model, Flask backend, and how the prediction process works.	3	T. Venu Siva Sai
5	Testing & Deployment	Demonstrate the deployed application on Render and briefly explain the testing performed.	2	K. Mahesh Reddy
6	Conclusion & Future Enhancements	Summarize the project, its benefits, and discuss possible future improvements.	2	T. Venu Siva Sai

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why users need a quick way to check their credit card eligibility before applying.
2	Solution Overview	Describe the architecture, technologies used, and the role of the Machine Learning model.
3	Live Feature Demonstration	Show the deployed website, enter sample details, click Predict Approval , and display the prediction result (Accepted or Rejected) on the same webpage.
4	Q&A Session	Answer questions about the dataset, Machine Learning model, system architecture, deployment, and future enhancements.
