Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviours, and limitations of your target audience.

<u>1. CUSTOMER SEGMENT(S) [CS]</u> Individuals who want to check their credit card eligibility before applying to a bank.	<u>6. CUSTOMER LIMITATIONS</u> Limited knowledge of eligibility criteria, limited understanding of financial factors, and dependence on internet access to use the system.	<u>5. AVAILABLE SOLUTIONS</u> <u>PROS & CONS [AS]</u> Bank websites: Reliable but do not provide eligibility prediction before applying. Online eligibility calculators: Quick but may not be accurate or personalized.
<u>2. PROBLEMS / PAINS + ITS FREQUENCY [PR]</u> Customers do not know whether they are eligible for a credit card. They are unsure if their application will be accepted or rejected.	<u>9. PROBLEM ROOT / CAUSE [RC]</u> Credit card eligibility depends on several financial factors, but customers do not know how these factors affect the bank's decision. Existing methods do not provide a simple, quick, and clear eligibility prediction.	<u>7. BEHAVIOR + ITS INTENSITY [BE]</u> Customers search online for eligibility information, compare credit card requirements, and want quick results before making a decision.
<u>3. TRIGGERS TO ACT [TR]</u> Customers want to avoid unnecessary application rejections and check their eligibility before applying.	<u>10. YOUR SOLUTION [SL]</u> Develop an AI & ML-based web application where users enter their financial details, and the system predicts whether they are Accepted or Rejected for credit card eligibility within a few seconds. The prediction	<u>8. CHANNELS OF BEHAVIOR [CH]</u> ONLINE: Web application, bank websites, search engines, financial websites.

4. EMOTIONS

BEFORE / AFTER [EM]

Before: Confused, uncertain, and worried about eligibility.

After: Confident if eligible or informed about their eligibility status if not eligible.
