Project Name	Credit Card Approval Eligibility
Maximum Marks	4 Marks

Empathy Map

The empathy map helps our team understand the needs, thoughts, actions, and emotions of a customer applying for a credit card. By understanding the customer's experience, we can identify the challenges they face during the application process and design a solution that is faster, more transparent, and user-friendly. This customer-focused approach helps us build a Credit Card Approval System that better meets user requirements.

SAYS • I want to know if I am eligible for a Credit card. • I need a quick eligibility process. • I want to know why my application is rejected.		Thinks • Will my application be approved? • Do I meet the bank's eligibility criteria? • How can I improve my chances of approval?
	Customer	
DOES • Fills out the credit card application form. • Submits personal and financial details. • Waits for the bank's approval decision.		FEELS • Confused about the eligibility criteria. • Anxious while waiting for the approval result • Happy if approved, disappointed if rejected.
