

Project Executable Files

Date	29 June 2026
Team ID	SWTID-2026-1236
Project Name	Credit Card Approval Eligibility
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
Credit_Card_Approval_System/
|
|— dataset/
|   └─ Cleaned_Credit_Card_Approval.xlsx
|
|— models/
|   └─ credit_model.pkl
|
|— app.py
|— train_model.py
|— requirements.txt
|— README.md
└─ templates/
    └─ index.html
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://credit-card-approval-prediction-jzjo.onrender.com
Login Credentials (Demo)	Not needed
Platform / Hosting Provider	Render
Repository Link	https://github.com/KamasaniMaheshReddy/Credit-Card-Approval-Prediction
Demo Video Link	https://drive.google.com/file/d/1aeEXTWwwJOY6A-3LL4GJdabb9H8CB8hr/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

- Download or clone the project from the GitHub repository.
- Install Python (3.10 or later).

- Install all required libraries using:

```
pip install -r requirements.txt
```

- Configure the MySQL database.
- Update the database connection details if required.

- Run the application:

```
python app.py
```

- Open the local URL shown in the terminal (for example, `http://127.0.0.1:5000`) in a web browser.
- Enter customer details and click **Predict Approval** to view the eligibility prediction.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality of the training dataset.	Model can be retrained with more data.
2	Requires an internet connection when using the deployed application	Run the project locally if internet is unavailable
3	Supports only credit card eligibility prediction.	Additional features can be added in future versions.
